

## TIPS: Maintenance of a Stucco Fine Finished with Natural Wax

To care for and clean a stucco fine surface finished with natural wax, it is essential to follow gentle methods to preserve the beauty and integrity of the finish. Here are some tips:

### REGULAR MAINTENANCE

- **Dusting:** Use a soft, dry cloth or a feather duster to remove dust. Avoid abrasive cloths that could scratch the surface.

### CLEANING

- **Dry Cleaning:** For light dirt, a slightly damp cloth will suffice. Avoid excessive use of water.
- **Cleaning with Mild Soap:** If the surface is dirtier, use a neutral soap (such as diluted Marseille soap) applied with a soft cloth. Rinse with a damp cloth and immediately dry with a clean cloth.
- **Avoid Harsh Chemicals:** Do not use strong detergents, abrasive cleaners, or alcohol, as they may damage the natural wax.

### WAX RESTAURATION

- **Wax Application:** If the surface loses its sheen or the wax protection seems diminished, apply a thin layer of natural wax. Allow it to dry, then polish with a soft cloth to restore the shine.
- **Polishing:** To maintain the gloss, occasionally polish the surface with a soft cloth.

---

### PRECAUTIONS

- **Avoid Impacts:** The stucco fine surface is relatively delicate. Avoid hitting it with hard objects.
- **Protect from Excessive Moisture:** While the wax provides some protection, avoid prolonged exposure to water or environments with very high humidity levels.

**By following these tips, you can maintain the aesthetic appeal of your stucco fine finish with natural wax.**
