

## TIPS: PAINTING, WHAT DO I NEED TO KNOW?

---

### I WANT TO PAINT WITH A NATURAL PAINT, WHAT DO I NEED TO KNOW?

Distributed by Tockay, Kreidezeit and Auro natural paints are **healthy and ecological**. They are the first choice when you want to decorate and ennoble your walls and ceilings with **natural beauty**.

These products, based on lime, casein and clay, and natural resin, are recommended for people with allergies, multiple sensitivities and, of course, for anyone who is concerned about their health.

All the products we distribute are petrochemical free, as evidenced by the **complete list of ingredients** available for each of our products. Please note that all dry residues of our products are **eco-friendly**. Depending on the product, they can either be composted or disposed of in the household waste. This is a real guarantee of the impact of our products on health and the environment, whereas synthetic paints, even without VOCs, must be deposited in hazardous waste.

### I HAVE NEVER USED A NATURAL PAINT, IS IT DIFFICULT?

No, the application of natural paints is generally comparable to that of a common synthetic paint but may have some specific characteristics. As they do not contain chemical ingredients to improve certain behaviors, they will require, for example, to be stirred from time to time during their application, they will have slightly longer drying times, etc. These characteristics do not constitute a major obstacle in themselves and above all avoid the use of toxic ingredients. All you have to do is **respect a few simple rules of application**.

**Do not hesitate to consult us to help you choose the natural paint most adapted to your project and your expectations.**

### ARE NATURAL PAINTS WASHABLE?

All of our paints are made from natural ingredients and have **anti-static properties that minimize dust attraction and dust mite growth**.

Most natural paints have a matte to velvety finish, which, like synthetic paints of the same finish, generally implies a lower resistance to dirt. As a general rule, the glossier the finish, the more resistant it is to dirt.

If you need a more resistant finish, **let us advise you in order to choose the most suitable paint for your needs!**
